CAPVOND SEWERAGE AND WATER TREATMENT COMPONENTS

With the constant improvements in industrial plastics not only in technical properties but also in basic weathering, Glassfibre is now proving to be one of the most versatile materials available which can be used in many different components all in the same treatment plant.

From Kiosks and Cabinets, Baffles and Boxes to versatile covers and gratings, the range of use for Glassfibre makes it the ideal choice for mouldings and components that require to be durable, non-conductive and easy to fit.

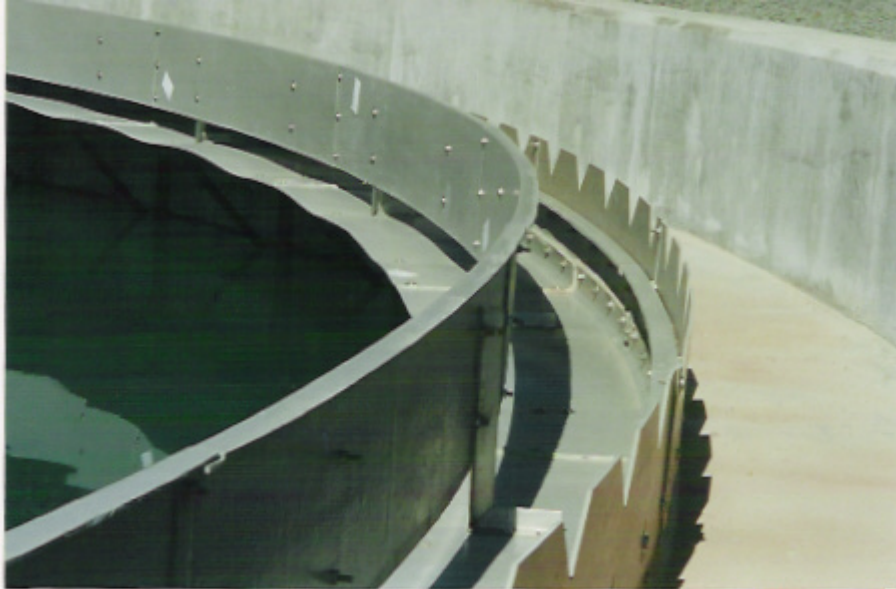

Glassfibre covers: for dosing, treatment and holding tanks can be manufactured to suit individual situation. Moulded using an ISOTHALIC GELCOAT given a durable and maintenance free product that can be produced in a variety of colours and with a range of finishes including "FIRMGRIP" safety surface where sure footing is essential.
